89 working with game version TPA 1 67 4 / Stern 1 2 8] The time has come to release my mod! Please read this post carefully, it contains most of the answers to the questions you may have.. Download Game hacks, Wireless hacks, Facebook Hacks – Download all for free [Current build: v1.. (3) X-Axis Translation slider - moves the cam linearly to the left and right (4) Raw value of the cam for each axis / slider.. (23) Save cam button - saves the current views to a * cam file (eg Cameras TableName.. The current build only works with DX11 version of the game How to use: - The mod requires to work properly.. The camera is totally static during gameplay, no more event or multiball camera, it provides the best experience for pincab owners, you can adjust the camera over the playfield to make it perfectly fit your screen or set a hybrid view to see the table and the DMD at the same time!Finally, you can save the view settings to a camera file that you can share with other people on the forum! The mod has been updated recently with some extra features and is now capable of custom backglass artwork and scoring displays on a separate monitor then the playfield itself, it also allows the DMD to be resized and moved independently of the playfield.. (5) X-Axis Rotation slider - rotate the camera to the top / bottom (6) Y-Axis Rotation slider - rotate the camera around the Y axis.
